With over 20 years experience is web design Metacraft offers high quality search optimized design and hosting services. Our server is located in a data centre in Preston and provides state of the art high speed data transfer. We are specialist in web design for the hospitality and catering industry, but also cover a wide array of industries and businesses from sole traders to national organizations such as The Nation Association of Retired Police Officers.

All clients receive the same level of care including 7 day a week support by phone or email. Websites can be designed around a market leading Content Management System which allows clients to maintain and update their site with no more technical knowledge than that require to use a word processor. Custom designed site are also available for your specific industry requirements.

Domain name registration, hosting and dedicated domain specific email account services are available for those wishing to create their own website and our server has a fully equipped CPanel server site software which allows the installation of a whole host of server scripts and services.
